(a) Dispersion index vs mean
monomer
chain
Poisson (disp=1)
overdispersed
variance / mean
feature mean
(b) Monomer dispersion (N=140)
count
dispersion index
(c) Chain dispersion (N=140)
count
dispersion index
(d) PMF: feature with mean≈0.0
observed
Poisson(λ=0.0)
NB(r=148.4)
probability
count
(e) Q-Q plot, feature 142 (λ=0.0)
empirical quantile
Poisson quantile
(f) NB vs Poisson: 56% features, NB wins
equal fit
count
ΔAIC (NB − Poisson)
1e6
